

## Correct Errors in Line Scheduler (Missing Attributes)

### Locate Errors under *Messages* tab

1. Open Order Scheduler
2. Click on the 'Algorithm Manger' dropdown menu
3. Select target line scheduler (PickleLine\_scheduler)  
Open Line Scheduler
4. If not on the 'Messages' screen, click on the 'Messages' button in the top navigation  
Messages Button Error Messages
5. Work through each error message and add the missing attribute under 'Interfaces'  
Right Click Interfaces
6. Either right click and select 'Edit' or double click the target interface to open the interface editor  
Interface Editor
7. Add the missing attributes by selecting them from the right-hand side (not displayed) and moving them to the left-hand side (displayed) by clicking the > button Interface Editor
8. Once complete, click OK
9. Right click on 'Planner-Interface', select 'Save' and the 'Load'  
Save and Load
10. You should be able to close the line scheduler, reopen the same line scheduler, navigate to 'Messages' and see that the error messages for the missing parameters added in the above steps are no longer showing

NOTE: The 'not displayed' viewer can be filtered using the 'Filter by' dropdown menu
