

Add Missing Attributes

Add the attribute to Fixed Attributes

- Open the Office GUI
- Navigate to Planning Repository Management > Planning Repository > FixedAttributes
- Select the appropriate Object Name in the top half of the screen
 - E.g. TAUP_APS_V
- Ensure that the selected Object has an Object ID in the range you are adding
Select Object
- Click the plus sign to add a new attribute
Add new Attribute
- Fill in each field for the new attribute
 - This information can be found for the same attribute in another schema (i.e. NSBB)
Attribute Fields
- Click on the Edit icon to ‘Enable table editing’
Enable table editing
- Click on the plus sign to ‘Insert new row in table’
Insert row in table
- Enter ‘Language’, ‘DispNameShort’, ‘DispNameLong’, and ‘Hint’
Enter Text
- Click the ‘Apply’ button
Click Apply
- Click on the Checkmark to save the changes
Save Changes
- Click on the ‘GenOnlSel’ button to write changes to database (view)
Generate Online Selection

Add the attribute(s) to Dynamic Attributes

- Select ‘Sheet Templates’ (top level)
- Click on the plus sign to add a Dynamic Attribute
Add Dynamic Attribute
- Select the target attribute from the ‘Choose Dynamic Attribute’ dialog
- Click the ‘Choose’ button
Choose Attribute
- Fill in ‘DynAttr Result’ and ‘Remark’
Attribute Properties
- Save the changes by clicking on the checkmark
Save Attribute
