Git metadata hook

Setup Guide

1. Start by pulling from main branch to get the latest changes
2. Go to the directory you cloned the repository in (psi folder level)
3. Right-Click > Git-Bash Here
4. Run the following in the Git-Bash terminal:
   - chmod +x -R "'git rev-parse –show-toplevel'/setups/"
   - ./setups/setup.sh
   - ./setups/initrevisions.sh
