Permissions for `psi` repository in Azure DevOps

Requirements

1. NBT MES developers (`MES Development`)

- a. Should have contributor access to all git repositories by default.

- b. Should apply towards PSI internal code reviews.

2. Selected Capgemini developers (`Capgemini PSI Contributors`)

- a. Should have contributor access to the `psi` git repository.

- b. Should apply towards PSI internal code reviews.

3. Selected PSI developers

- a. Some PSI developers participate in PSI external code reviews. (`PSI External Reviewers`)

- b. Some PSI developers do not participate in code reviews. (`PSI External No Review`)

- c. Developers in both groups should have contributor access to the `psi` git repository.

Membership

MES Development

Should contain NBT MES developers only. No Capgemini or PSI team members should be in this group.

Capgemini PSI Contributors

Should contain designated Capgemini developers who contribute to the PSI project.

PSI External Reviewers

Should contain PSI team members who participate in code reviews.

PSI External No Review

Should contain PSI team members who contribute to the project but do not participate in code reviews.
