Add DDQ Rule Columns Through Office GUI

Check RE_CONTEXTDETAILS for Target Column

Query the RE_CONTEXTDETAILS table for the target column

```
SELECT * FROM RE_CONTEXTDETAILS
WHERE CONTEXT_ID = 'PRM_DDQ_CTX'
```

If you do not see the target ATTR_NAME in the results, use the below insert
statement to add a new row into the RE_CONTEXTDDELAIS table

```
INSERT INTO RE_CONTEXTDETAILS
 (CONTEXT_ID, ATTR_NAME, DESCRIPTION, DATA_TYPE, CHAR_LENGTH, DATA_PRECISION, DATA_SCALE, VA
VALUES
 ('PRM_DDQ_CTX', 'DDQGRADE', 'Product Family for DDQ', 'VARCHAR2', 25, NULL, NULL, NULL, 'W'
```

> **IMPORTANT**
>
> Make sure to change the values of the above insert statement to
> match the target column.

Add Column Through Office GUI

- Open the Office GUI
- Navigate to Rule Management > Rules > DDQ Rules
- Click on the 'EditTableStructure' button
  Edit Table Structure
- Click on the 'New' button
  Table Columns
