Restart DDQ/MPlanner Through BTScheduler

1. Open BTScheduler for Planning server
2. Click on 'Scheduler' in top navigation
3. Click on 'ConnectAsUser'
   Connect As User
4. Enter password for 'Administrator' account
   BTScheduler Admin
5. Right-click on 'DDQ-STD-Control'
6. Select 'Stop'
   DDQ Control Stop
7. Right-click on 'DDQ-STD-Control'
8. Select 'Start'
9. Monitor to ensure all services come back up. Should look like the below screenshot
   DDQ/MPlanner Running
10. Restart DDQ_MP_PPL Service
